replica designer hand bags

Love this app because it SHUFFLES (not after each hand)!! I have no idea how man y decks but it at least allows me a beautiful and fun setting to practice and I just assume it's 6 or eight decks based on the amount of hands dealt. Also, the way the emoticons pop up after every hand encourages use and I have for und it to be a very good stress reliever. It does have it's share of uneducated players who split tens or hit a thirte en against a five, so I think they should add a tutorial or strategy card. Also, I play pretty low amounts but WOW! They give away bonus money like no other r app I have tried! I like having a big bank, it makes me feel like I can always play if I want to.

Last but not least is the AMAZING DOUBLE PAY!!! when the tube fills up and goes from blue to red it pays the next hand DOUBLE!!! Only pay, not take so I find my self watching it and the anticipation builds then it's really exciting to up my bet and see what happens.

I hate to admit this, but it even softens my anger a little toward people who s

plit tens! Crazy,

I would pay for another single or double deck to be added to this app if it shuf

fles after 70% penetration (Please make one)

Thank you thank you!!!
